Thin Solid Films, *171* (1989) 379–380

Contents of Vol. 171

Obituaries 1

Stress-related effects in thin films 5
J. A. Thornton (Santa Monica, CA, U.S.A.) and D. W. Hoffman (Dearborn, MI, U.S.A.)

On the relations between the δ-Cr and α-Cr phases 33
M. I. Bîrjega and N. Popescu-Pogrion (Bucharest-Măgurele, Romania)

Porous structure of SiO_2 films synthesized at low temperature and pressure 43
M. R. Baklanov, L. L. Vasilyeva, T. A. Gavrilova, F. N. Dultsev, K. P. Mogilnikov and L. A. Nenasheva (Novosibirsk, U.S.S.R.)

Mechanism of gas detection in polycrystalline thick film SnO_2 sensors 53
N. Bârsan, R. Grigorovici, R. Ionescu, M. Motronea and A. Vancu (Bucharest-Măgurele, Romania)

Mass spectrometric studies of positive ions in r.f. glow discharges 65
J. W. Coburn (San Jose, CA, U.S.A.)

Note on the origin of intrinsic stresses in films deposited via evaporation and sputtering 81
F. M. d'Heurle (Kista, Sweden) and J. M. E. Harper (Yorktown Heights, NY, U.S.A.)

Adhesion measurement of thin films on glass substrates 93
A. Kinbara, S. Baba, A. Kikuchi (Tokyo, Japan), T. Kajiwara and K. Watanabe (Ofuna, Japan)

Early days of magnetron sputtering—an enigma 99
A. S. Penfold (Cornish, NH, U.S.A.)

Growth of $CuInSe_2$ by two magnetron sputtering techniques 109
A. Rockett, T. C. Lommasson, P. Campos, L. C. Yang and H. Talieh (Urbana, IL, U.S.A.)

Magnetron plasma deposition processes 125
S. M. Rossnagel (Yorktown Heights, NY, U.S.A.)

Film modification by low energy ion bombardment during deposition 143
S. M. Rossnagel and J. J. Cuomo (Yorktown Heights, NY, U.S.A.)

Preparation of amorphous i-C films by ion-assisted methods. 157
W. Scharff, K. Hammer, O. Stenzel, J. Ullman, M. Vogel, T. Frauenheim, B. Eibisch, S. Roth, S. Schulze and I. Mühling (Karl-Marx-Stadt, G.D.R.)

The effect of target power on the nitrogen partial pressure level and hardness of reactively sputtered titanium nitride coatings 171
W. D. Sproul, P. J. Rudnik (Evanston, IL, U.S.A.) and C. A. Gogol (East Syracuse, NY, U.S.A.)

Strain, ion bombardment and energetic neutrals in magnetron sputtering 183
B. Window and K.-H. Muller (Sydney, N.S.W., Australia)

Residual stress in physically vapor deposited films: a study of deviations from elastic behavior. . . 197
A. J. Perry and M. Jagner (Troy, MI, U.S.A.)

Hydrogenated amorphous silicon films deposited by reactive sputtering: the electronic properties, hydrogen bonding and microstructure 217
M. Pinarbasi, N. Maley, A. Myers and J. R. Abelson (Urbana, IL, U.S.A.)

Recrystallization of silicon-on-insulator layers in pulsed nanosecond heating (model calculations) 235
L. N. Aleksandrov, V. Yu Balandin, A. V. Dvurechenskii and O. A. Kulyasova (Novosibirsk, U.S.S.R.)

ELECTRONICS AND OPTICS

Analysis of inhomogeneous thin films by spectrophotometric measurements 243
A. Piegari and G. Emiliani (Rome, Italy)

Compositional analysis of lead titanate thin films by Auger electron spectroscopy and their electrical properties 251
S.-G. Yoon, H.-Y. Lee and H.-G. Kim (Seoul, South Korea)

METALLURGICAL AND PROTECTIVE COATINGS

Preparation of TiN thin films by the dynamic mixing method using an N_2^+ ion beam of 1 keV . . . 263
I. Takano and S. Isobe (Tokyo, Japan), T. A. Sasaki and Y. Baba (Ibaraki-ken, Japan)

PREPARATION AND CHARACTERIZATION

Photoluminescence of CdTe films grown on BaF_2 with PbTe buffer layers by hot-wall epitaxy . . 271
W. Uchida, H. Sitter, K. Lischka and H. Heinrich (Linz, Austria)

Nickel silicide formation in electroless plated films on silicon: low temperature growth of Ni_3Si_2, morphology and electrical resistance 277
B. B. Nayak, S. K. Singh and B. S. Acharya (Bhubaneswar, India)

Substrate-dependent growth of atmospheric pressure chemically vapor deposited silicon dioxide from dichlorosilane and oxygen 291
J. D. Chapple-Sokol and R. G. Gordon (Cambridge, MA, U.S.A.)

Influence of substrate and target temperatures on properties of transparent and conductive doped ZnO thin films prepared by r.f. magnetron sputtering 307
T. Minami, H. Sato, T. Sonoda, H. Nanto and S. Takata (Ishikawa, Japan)

Deposition and characterization of electroless palladium on austenitic stainless steel 313
H. Ocken (Palo Alto, CA, U.S.A.), B. G. Pound (Menlo Park, CA, U.S.A.) and D. H. Lister (Chalk River, Ontario, Canada)

Thin films to impede the incorporation of radionuclides in austenitic stainless steels 323
H. Ocken (Palo Alto, CA, U.S.A.), C. C. Lin (Pleasanton, CA, U.S.A.) and D. H. Lister (Chalk River, Ontario, Canada)

Deposition of stainless steel film using pulsed laser evaporation 335
V. N. Koinkar, S. M. Chaudhari, S. M. Kanetkar and S. B. Ogale (Pune, India)

Comparison of the diffusion barrier properties of tungsten films prepared by hydrogen and silicon reduction of tungsten hexafluoride 343
O. Thomas, A. Charai and F. M. d'Heurle (Yorktown Heights, NY, U.S.A.), T. G. Finstad (Blindern, Norway) and R. V. Joshi (Yorktown Heights, NY, U.S.A.)

LANGMUIR–BLODGETT AND RELATED FILMS

Observation of molecular orientation in evaporated films of *n*-paraffins 359
K. Fukao, T. Horiuchi and K. Matsushige (Fukuoka, Japan)

GENERAL FILM BEHAVIOUR

On the possibility of thin film structure study with a quartz crystal microbalance 367
V. M. Mecea, R. V. Bucur and E. Indrea (Cluj-Napoca, Romania)

AUTHOR INDEX 377
